### **Areas of Specialty:**

Adults with spinal cord injury, burns or amputations

### **About Elvina:**

"I am an experienced OT in the provision of comprehensive case management for adults who have experienced orthopedic, spinal, neurological injuries & amputations post MVA within Inner Sydney. I have clinical expertise & interest in gerontology. I employ a client focused approach to case management, coupled with effective communication & negotiation skills. I have a clear understanding of specialist allied health services & most recently have been effective in finding a suitable high level care placement for an LTCSA participant. I implemented a program of education & support for the care staff in order to ensure the participant was receiving optimum care."
